

## The Document Creation Assistant

*The Eloquent Physician™* is a software solution that revolutionizes medical office documentation and patient chart management. *The Eloquent Physician™* enables the physician and other health care providers to create accurate, comprehensive, detailed personalized medical records and correspondence WITHIN SECONDS!

# The Eloquent Physician™

## What Can The Eloquent Physician Do For You?

Unlike the template-based medical document creation programs released in the mid 1990's, *The Eloquent Physician* allows for customization by the physician or staff on the fly. It also includes over 500 insertables of medical terms, diagnoses and procedures commonly used by most physicians. Specialty versions are now available for Orthopedic Surgeons with specialty versions for Physical Therapists, Family Practice and Cardiology due for release shortly.

The product is voice-enabled so that the practitioner has the option of utilizing it with state-of-the-art voice activation technology such as Dragon NaturallySpeaking™ or a combination of the mouse and keyboard. *The Eloquent Physician* also functions as a database manager and report generator.

Since physicians frequently do not enjoy putting in the demographic information regarding their patients, we offer a networked version. With this version you can either have your front office staff manually input this information on a different PC, or you can actually download the demographics from most medical billing systems.

- Reduce Transcription costs
- Avoid "Cookie-Cutter" dictation
- Custom Reports Quickly
- Optimize Your Workflow
- Utilize Speech Recognition
- Networkable
- Integrate Your Database
- Increase Office Efficiency
- Customizable Macros
- Have Hands On Training

## The Eloquent Physician - Features

### Make a Full Medical Report Quickly

Advanced Macros from Dragon NaturallySpeaking along with The Eloquent Physician's patented report creation capabilities let you make "Eloquent" reports with a few well spoken words and phrases

### Fully Customizable Templates, Insertables and Patient Information Database

Include basic patient information as well as information pertinent to your practice, such as immunization dates, attending surgeons, current medications, family history, etc. Avoid the "Cookie Cutter" trap with gender specific and name specific insertables

### Commands and Macros

Create single word commands to load preselected templates and insertables

### Local Representatives Available to Serve you at YOUR office

Experienced Voice Recognition Experts available to you for training, support, and customization assistance nationwide

### Voice Enabled with Dragon NaturallySpeaking® Medical Suite

Including Select and Say® Editing, up to 99% accuracy, and an expansive 240,000 word medical dictionary

### Easy Correspondence with referring Doctors using the Referral Database

Merge a customized letter to the referring doctor using editable templates

### Universal Medical Specialties Supported

Make your Eloquent Physician the "Eloquent Dermatologist", or the "Eloquent Cardiologist"....it's all up to what your practice needs

### Export Reports to Microsoft® Word

Use the #1 Word Processing Program in the world

### Edit, and Print Previous and Current Reports

Change the Font Type and Size easily

### Exportable and Importable Database Options

Medical Manager® | Soft Net Accounting® | Quick Books®  
Microsoft Access® database compatible  
Others

### Client-Server Networkable Capability

Have assistants input patient information at their workstations and draw on that information for the reports on the doctor's PC

### 30 Day Free Technical Support

Upgrades For Free for the first year

### Extensive Help File

Cross-reference key words  
Expansive Glossary of terms

10 years ago I doubled the size of my practice in less than 1 year by dictating extraordinarily complex notes and sending them to my referral sources within just a few days. However there was a problem. I worked over 90 hours a week, many of them after midnight with a dictation device in my hand.

During the next **10 years** I developed a system to do it more quickly, efficiently, professionally and inexpensively.

Now in **1 day** you can have the benefit of my 10 years of fixation with medical reporting methods. Incorporating voice recognition technology, The Eloquent Physician can give you the benefit of comprehensive notes, without the requirement to spend those hours dictating, those days waiting or those frustrations of lost tapes and delayed payments.

Eric Fishman, M.D.

## Minimum Requirements

Pentium II 400 or Higher

128MB of RAM

Minimum 1GB of Hard Drive  
(Depends on Size of Patient Database)

Microsoft Word & Access  
(Office 97 / 2000 Recommended)

Windows 95/98/NT

## Recommended Training

Installation: 2 Hours Per PC

Training: 4 Hours Per MD

Customization: 2 to 16 Hours  
Per Office

## Free 30 Day Demo
